

The Perfect Shot

Intention:

Patience is a virtue. Sometimes, only time can tell. The Google Map Screen Shots are only representational of potential panoramic views or a video that could be used for this concept. But the experience of being able to shift left and right, as well as look up and down (through scroll) in order to find the right person, moment, time and light to capture a photo, encapsulates the exercise of patience, reflection and sacrifice in my chosen space: the kitchen countertop.
